Kafr El-Shaikh, Egypt

Flutter Developer with 2 years of experience building and maintaining high-performance mobile applications. Skilled in integrating REST APIs, writing clean, scalable code, and optimizing app performance. Collaborates effectively with designers and backend teams to deliver efficient, user-focused solutions aligned with modern development standards.

Work Experience

Freelance Flutter Developer Jun 2024 - Present
Remote | Self-employed

- Developed and maintained scalable mobile applications using Flutter and Dart following clean architecture principles.
- Implemented state management solutions using Bloc/Cubit to ensure maintainable and predictable app behavior.
- Integrated RESTful APIs and backend services, handling data efficiently with robust error handling.
- Utilized Git for version control and collaborated with clients to deliver high-quality, production-ready applications.
- Debugged issues and optimized app performance, improving responsiveness and user experience.

Flutter Developer – Graduation Project Nov 2024 - Apr 2025
Faculty of Engineering | Kafr El-Sheikh University

- Built a cross-platform Flutter application for a non-invasive blood glucose monitoring system.
- Collaborated with backend, AI, and hardware teams to deliver a fully integrated solution.
- Solved complex technical challenges related to data flow, performance, and system integration.

Data Science Intern Oct 2024 - Mar 2025
Digital Egypt Pioneers Initiative (DEPI) – EYOUTH | Tanta, Egypt

- Performed data preprocessing, feature engineering, and exploratory data analysis on real datasets.

Projects

GlucMate – Non-Invasive Glucose Monitoring System Dec 2024 - Mar 2025
Developed a Flutter mobile app integrated with a glucose monitoring device and AI prediction model, collaborating with hardware and machine learning teams to enable real-time health monitoring.

Trip Genie – AI Travel Planning Application Dec 2025 - Feb 2026
Built a Flutter mobile application that helps tourists discover Egyptian destinations by generating AI-powered travel itineraries and optimized visiting schedules based on user preferences.

Core Skills

Technical Skills: Flutter, Dart, Bloc/Cubit, Provider, RESTful APIs Integration, JSON Handling, Git, GitHub, Version Control, Clean Architecture, Software Design Patterns, Debugging & Performance Optimization

Education

Bachelor of Science in Electrical Engineering (Computers Department) 2021 - 2025
Relevant Coursework: Data Structures, Algorithms, OOP, Databases, Software Engineering
GPA: Very Good (B+)
