

Abdelwahab Mohamed Abdelwahab

Junior Flutter Developer

abdelwahab.mohamedd743@gmail.com • +201061288457 • Kafr El-Sheikh, Egypt (Open to Relocation)

[LinkedIn](#) • [Portfolio](#) • [GitHub](#)

Profile

Junior Flutter Developer with experience in building and publishing mobile applications on Google Play. Open to opportunities in startups, enterprises, and software houses, with flexibility to work on-site, hybrid, or remotely. Motivated to grow professionally and deliver reliable, user-focused mobile applications.

Education

B.Sc. in Electrical Engineering (Computer Engineering), Kafr El-Sheikh University

September 2021 - July 2025

Grade: Very Good (B+)

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming (OOP), Database Systems, Software Engineering, Operating Systems, Computer Networks, Machine Learning, Data Science.

Graduation Project: Non-Invasive Blood Glucose Monitoring System using AI Models (ANN, XGBoost), Embedded Systems (ESP32), and a Flutter Mobile Application for real-time glucose prediction and visualization (Grade: Excellent).

Experience

Freelance Flutter Developer, Remote

April 2025 - Present

- Integrated REST APIs, Firebase services, push notifications, and state management solutions.
- Developing custom Flutter applications for Android and iOS with responsive UI and production-ready features.

Flutter Instructor at Black Horse Courses, Alexandria

April 2026 - May 2026

- Designed and delivered a comprehensive Flutter course for Android & iOS development over 12 sessions.
- Taught core concepts including Dart, Object-Oriented Programming (OOP), SQLite, State Management, REST APIs, and Firebase.

Coding Instructor at Kid Coder, Kafr El-Sheikh

February 2026 - April 2026

- Introduced core software development concepts including problem solving, UI design, and app logic.
- Delivered a 15-session training program covering MIT App Inventor, Dart fundamentals, and a Flutter introduction.

Flutter Intern at National Telecommunication Institute (NTI), Tanta

December 2025 - March 2026

- Enhanced code quality in +4 Flutter projects using clean code principles.
- Completed a 120-hour Flutter internship, building +5 applications and finishing +16 graded technical tasks with a 100% score.

Technical Skills

Programming Languages: Dart, PHP, Python, SQL.

Frameworks: Flutter (Android, IOS, Web, Desktop)

Databases & Local Storage: Firebase, Supabase, Hive, Sqflite, Isar, Shared Preferences.

State Management: Bloc, Cubit, Provider, Riverpod, Signals.

Architecture: Clean Architecture, MVVM, MVC, SOLID Principles, Design Patterns.

APIs & Services: REST APIs, Google Maps API, Gemini API, Firebase Cloud Messaging (FCM), Web Scraping.

Networking: Dio, Http.

Testing: Unit Testing, Widget Testing, Integration Testing.

Tools & Platforms: Git, GitHub, Postman, Figma, Android Studio, VS Code.

AI Productivity Tools: ChatGPT, Claude, Gemini, Grok, Cursor, Antigravity, GitHub Copilot.

Projects

Trip Genie

December 2025 - March 2026

AI-powered travel assistant that generates personalized itineraries and travel recommendations for destinations across Egypt.

- Developed a Flutter app using Clean Architecture to create smart travel plans, attraction details, and AI-generated recommendations.
- Integrated Gemini API to generate personalized itineraries, travel tips, and destination insights based on user preferences.
- Used Supabase for authentication and cloud sync, and Hive for local caching and offline data storage.

GlucoMate

February 2025 - June 2025

A non-invasive blood glucose monitoring mobile application that connects to an ESP32-based hardware device via Bluetooth to collect sensor data and provide real-time glucose predictions.

- Built a Flutter app (20+ screens) for glucose tracking, insights, and AI-based health recommendations with patient & partner roles.
- Integrated ESP32 via Bluetooth to stream sensor data and run ANN-based glucose prediction + XGBoost diabetes classification.
- Used Supabase for auth and real-time storage, and Gemini API for personalized medical recommendations.

Tasky

January 2026 - February 2026

Productivity application for managing tasks, priorities, and notes in a clean and intuitive interface.

- Developed a Flutter app to create, update, prioritize, and track tasks, with a built-in notes section for reminders and ideas.
- Applied Clean Architecture to build a scalable and maintainable codebase with clear separation of concerns.
- Used Isar Database for fast local storage and implemented a responsive UI optimized for different screen sizes.

NEWST

February 2026 - March 2026

News application that delivers the latest headlines from multiple categories around the world.

- Developed a Flutter app to fetch and display global news across categories such as business, sports, technology, and health.
- Integrated Dio for API communication and Hive for local caching to improve performance and offline access.
- Applied Clean Architecture to create a scalable, maintainable, and well-structured codebase.

Languages

English - Proficient

Arabic - Native
